Abstract of CN 2122896 (U)

The utility model belongs to building decoration material, which is used for laying the indoor ground and the outdoor ground. The utility model which is a matched floor with a single side or double sides is compounded by more than two different kinds of material. A skin layer is provided with various patterns which are beautiful and colorful, and a joist which is convenient assembly and disassembly is cushioned under the matched floor, wherein, the double sides of the matched floor with double sides can be exchanged for providing rich colors to beautify the ground environment.
